Professional Summary

Full Stack Developer with 2.6+ years of experience building enterprise-grade applications using Java, Spring Boot, and Angular. Skilled in developing scalable REST APIs, responsive frontend applications, real-time features and microservices for regulatory and government platforms.

Technical Skills

Languages: Java, JavaScript (ES6+), TypeScript, Python

Front-End Technologies: Angular, React.js, RxJS, NgRx, Angular Material, PrimeNG, HTML5, CSS, Bootstrap

Backend Development: Spring Boot, Spring Cloud, Eureka Server, Spring Security (JWT, OAuth2), JPA/Hibernate, RESTful Web Services, Microservices Architecture, Caching

AI & GenAI: Spring AI, OpenAI API, Ollama, RAG, Vector Databases, Prompt Engineering, LLM

Database: MySQL, MongoDB, Oracle, Redis

AI Tools: Claude, GitHub Copilot, Amazon Q, ChatGPT, Cursor, Codex

Developer Tools & Platforms: AWS, Azure, Postman, Git, GitHub, Docker

Experience

IRIS Regtech Solutions Ltd

Jan 2024 – Present

Software Engineer

Mumbai, India

- **SARB (South African Reserve Bank) – The Corporation for Deposit Insurance (CODI)** is South Africa's deposit insurance scheme, responsible for managing the country's Deposit Insurance Fund (DIF). Contributed to full-stack development using **Angular** for the front end and **Java/Spring Boot** for backend services.
- Implemented real-time push notifications in **Angular** application using **WebSockets** (STOMP + SockJS), reducing user response time by **30%** and improving overall user experience.
- Built dynamic and interactive charts using **ApexCharts** to transform complex regulatory data into actionable insights.
- Developed and deployed **RESTful APIs** using **Java(Spring Boot)** and **ORM tools (Hibernate/JPA)** to enable efficient data access and robust **CRUD operations** across relational databases.
- Built asynchronous and background processing workflows leveraging **Spring Scheduling**, enabling efficient handling of time-based operations and reducing manual operational effort by **40%**.
- **SBC (Saudi Business Centre)** – A Saudi government initiative focused on simplifying business registration and licensing processes. Contributed to full-stack development using **Angular** and **Spring Boot**, developing scalable frontend modules and secure RESTful APIs.
- Configured **Angular i18n** and translation modules to enable multi-language support with dynamic content translation.
- Implemented Angular **Micro Frontend** architecture using **Module Federation**, enabling modular feature development, independent deployment, and improved application scalability.
- Optimized Angular application performance by implementing lazy loading, route-level code splitting, AOT compilation, and tree shaking, reducing initial bundle size by **40%** and significantly improving load time and runtime efficiency.
- Developed scalable REST APIs using **Spring Boot** and **JPA/Hibernate** for business registration and licensing.
- Implemented backend business logic, API validation, exception handling, and database integration using Spring Boot.

Projects

JobWaves | [LINK](#)

- Developed a full-stack job portal with Admin, Recruiter, and Candidate roles, implementing JWT authentication and Role-Based Access Control (RBAC) using **Spring Boot** and **Angular**.
- Built **Angular** frontend using Reactive Forms and RxJS for state management and asynchronous API integration.
- Implemented **OTP**-based email password recovery and real-time notifications for job application updates.

Education

Shri Sant Gajanan Maharaj College of Engineering, Shegaon

August 2021 - May 2024

Bachelor of Engineering in Computer Science

CGPA-8.70 / 10

Government Polytechnic, Amravati

Sept 2018 - June 2021

Diploma in Mechanical Engineering

Percentage-97.75%

Certifications

- Microsoft Certified: Azure Fundamentals
